

After School Tutoring

MathTutoring

Our Math tutors are highly qualified and have expertise in mathematical applications such as General Math, Algebra, and Geometry. Our tutors have the ability to properly assess the needs of each student and to provide maximum benefit. Tutors will maintain proficiency in math trends, styles and strategies.

EnglishTutoring

Our English tutors will prepare several lessons covering grammatical basics such as subject-verb agreement; pronouns and antecedent agreements, nouns, syllables and other often misunderstood proper writing techniques. The goal is to make the student a stronger writer and heighten natural literacy.

Secondary Language (Spanish)

It is important for our students to speak a second (Spanish) language. By learning Spanish, they will be better able to communicate with Spanish speakers. Latin American countries are our most important trading partners. Speaking Spanish greatly enhances a person's resume. If you are bilingual you are more competitive in the workplace.
